Career Objective

Backend Developer with strong expertise in **Laravel and PHP**, experienced in building **scalable, event-driven systems, real-time features**, and **secure integrations**. Dedicated to writing **clean, maintainable code** and delivering **reliable web applications** that balance performance with business impact.

Professional Experience

Backend Developer - Almasader Alraqamiah :

03/2025 – Present

Worked on **large-scale Laravel projects** with diverse business requirements, delivering modular, maintainable codebases, secure authentication systems, real-time features, API integrations, payment workflows, and multi-environment deployments while ensuring system performance and smooth team collaborations.

Key Contributions:

- **Scalable Architecture:** Designed modular, maintainable Laravel codebases with clean feature separation for long-term scalability across large projects.
- **Authentication & Access Control:** Implemented secure authentication and robust authorization systems for scalable and protected applications.
- **Payments & Integrations:** Integrated multiple payment gateways and wallet systems, handling various payment models and transaction workflows.
- **API Development & Integrations:** Designed RESTful APIs and integrated external services (SMS, maps/location, shipping, internal APIs) with structured responses.
- **Asynchronous & Real-Time Features:** Implemented queues, jobs, observers, events, broadcasting, and scheduling for background tasks; built real-time notifications, chat systems and live tracking features.
- **Infrastructure & Deployment:** Managed CPANEL servers, multi-environment deployments, and production monitoring. Implemented **GitLab CI/CD pipelines** to automate builds and streamline releases.
- **Cross-Cutting Concerns:** Applied security best practices, implemented multilingual support , maintained testing for stability, and collaborated closely with frontend, QA, and product teams.
- **Project Variety:** Worked across e-commerce, food delivery, educational platforms, custom business systems, and many more, each with unique logic and workflows.

Backend Developer - Technomasr for web solutions :

10/2024 – 03/2025

Worked as a Laravel backend developer on multiple web applications, focusing on **scalable systems, admin dashboards**, and integrations for **real-time communication** and **secure transactions**.

Key Contributions:

- Built **scalable backend systems** with **Laravel, RESTful APIs**, and **performance optimizations**.
- Developed **dynamic admin dashboards** with **Blade** and **Livewire**.
- Integrated **secure payment gateways** and **real-time notifications**.
- Implemented **authentication** and **role-based access control**.
- Collaborated with **cross-functional teams** to deliver **reliable solutions**.

Projects

iCone – Large-scale eCommerce system for electronics ([icone.sa](#)).

- Implemented **cards, wallet payments, order tracking, returns, and dynamic discounts.**
- Enabled **bulk product import** via Excel.

Almuwahhid Alkhaleeji – Business incubator platform ([mohadalkhalig.com](#)) :

- Implemented **multi-role system** (trainer, investor, provider) with **service subscriptions.**
- Developed **online & offline course subscriptions** with **management** and **evaluation** features.
- Built **real-time chat rooms, exhibitions, initiatives, negotiation systems,** and integrated **payments.**

Linkora – Social media for companies : ([Google Play](#))

- Built **posts, likes, follows, departmental chat, FCM-based alerts,** and **bids** for company's tenders.

7ajatna – Multi-vendor marketplace ([7ajatna.com](#)).

- Enabled **localized store creation requests** and **country-based product browsing.**
- Developed **multi-vendor support** with product management

Foodsation – Food delivery platform (in development) :

- Built a **multi-application system** with 3 mobile apps (client for browsing & ordering, provider for managing menus/orders, and delivery for driver onboarding & tracking).
- Developed **admin and provider dashboards** to oversee operations, ordering, and delivery workflows.

Additional Work

Built many additional projects ranging from personal portfolios to clothing and lighting e-commerce platforms, and a trading-oriented platform for managing offers, contracts, Also developed a cargo-delivery request system connecting clients with transport service providers .

Published Packages

Laravel AutoTranslator

- Automates scanning and translating Laravel language files and auto-generates missing JSON keys.
- Supports multiple translation drivers, including MyMemory (free) and DeepL (free tier).
- [GitHub](#) | [Packagist](#)

Skills

- **Backend:** Laravel, PHP, MySQL, RESTful APIs, Laravel Filament, Livewire
- **Frontend:** HTML, CSS, JavaScript, Bootstrap
- **Version Control & Deployment:** Git, GitHub, GitLab, CI/CD, Server Management (cPanel, Hostinger)
- **Services & Integrations:** Firebase, Pusher, Payment Gateway Integration
- **Programming Fundamentals:** OOP, Design Patterns, Data Structures, Algorithms, SOLID Principles

Education

Bachelor of Computer Science,

2020 – 2024

Faculty of Computers and Information Systems , Mansoura University (Very Good)

Internship

Information Technology Institute (ITI) Summer Training, (3 Months)

2023

An internship at (ITI), Where I had the opportunity to gain hands-on experience in PHP , Laravel development , frontend technologies and database management.
